About This Game

This retro-inspired 2D **Action RPG** might outright surprise you. CrossCode combines 16-bit SNES-style graphics with butter-smooth physics, a fast-paced combat system, and engaging puzzle mechanics, served with a gripping sci-fi story.

CrossCode is all about **how it plays!** That's why there is a **free Steam demo!** Go give it a try! Take the best out of two popular genres, find a good balance between them and make a great game. During the fast-paced battles you will use the tools you find on your journey to reveal and exploit the enemies' weaknesses and at the same time will be able to choose equipment and skills for a more in-depth approach in fighting your enemies.

What's included in the full version:

- Dive into a massive adventure with a playtime of around **30-80 hours**
- Explore a large world with **7 unique areas** and hidden secrets all over the place
- Fight over **120 enemy types** including **30+ boss fights**
- Enter **7 expansive dungeons**, all with with unique themes and puzzle mechanics

-
- Master over **90 combat arts** and even more passive skills

Hello everyball!

We collected your votes and here are the results:

[English Poll Results](http://www.strawpoll.me)[www.strawpoll.me]

As you can see, the clear majority voted to **focus on a 1.0 release!** And that is what we will do now! In order to accelerate development we will **skip version 0.9.9** and head straight for 1.0!

That also means there won't be any version update for a fairly long time. However, we will make sure to **update the Final To Do List** on a regular basis (at least every month) to keep you updated on how things are moving forward!

Thanks a lot for the participation in the polls and for being such a patient and awesome community in general!
