Assume you want to create a shortcut key for “Pages” app for the menu “View > Show Word Count”.. Is this the correct way to add hotkeys? For instance I would like Command+Esc to open Terminal.. Choose Apple menu > System Preferences, click Keyboard, then click Shortcuts Select App Shortcuts on the left, click the Add button, click the Application pop-up menu, then choose a specific app or All Applications.

Click the + button beneath the list of apps, and choose System Preferences from the pop-up menu.. As you can see, the keyboard shortcut section of the System Preferences presents a powerful way to customize your Mac to your liking.. For example, to set a shortcut for a TextEdit command, choose TextEdit Step3 – Choosing App and Menu.. If you find that a specific app doesn't have a keyboard shortcut that you need, just change it.
